Reentry Learning Collaborative

The Texas Health and Human Services Commission (HHSC) Office of Behavioral Health Services completed the Reentry Learning Collaborative for fiscal year 2025. The collaborative supported local teams in building reentry programs that promote continuity of care and recovery support for people with mental illness or co-occurring substance use disorders returning to the community after incarceration in a local jail.

Participating teams focused on four reentry pathways:

- Pre-release reentry services within correctional settings
- In-reach by community-based providers (in person or through teleservices)
- One-stop reentry service centers
- Reentry services embedded in pretrial or probation agencies

Collaborative members also received guidance on best practices, including re-enrollment in services, access to medications, sharing medical records and connecting people to recovery support such as peer services, housing, transportation, and employment assistance.

We are developing a comprehensive reentry resource guide, which will be available on the [TXBHJ website](#) for public use later this calendar year.

Keep an eye on this space! Applications for the fiscal year 2026 Learning Collaborative with a focus on housing, will be coming soon.
